

# Food Chains Worksheet 6

Study a habitat close to where you live. Have a go at creating a food chain that exists in your chosen habitat. Things to consider...

- What plants are in the habitat?
- What animals live in the habitat?
- What do the animals in the habitat eat?

Draw a simple sketch in the box below of your chosen habitat. Label important features such as the different plants and a pond. Complete the food chain diagram at the bottom.
